

CYBEREDGE GROUP **2014 CYBERTHREAT DEFENSE REPORT**

In November 2013, over 750 information security practitioners working for organizations with 500+ employees responded to an online survey designed to gauge how they perceive cyberthreats and assess how their organizations are defending against them. Here's what we learned...

THE BYOD INVASION

By 2016, 77% of responding organizations indicate they'll have bring-your-own-device (BYOD) policies in place.

HEALTHY SECURITY BUDGETS

Are IT security budgets staying the same, increasing, or decreasing? Thankfully, only one in 10 are falling.

INADEQUATE INVESTMENTS

1 in **4** doubt whether their employer has invested adequately in cyberthreat defenses.

WISHFUL THINKING

Although 60% were hit with a successful cyberattack in 2013, only 40% expect to be struck again in 2014.

TARGETED FOR ACQUISITION

Of 19 network security technologies designed to mitigate cyberthreats, the top four targeted for acquisition in 2014 are...

NEXT-GEN FIREWALL

NETWORK BEHAVIOR ANALYSIS

BIG DATA SECURITY ANALYTICS

SECURITY INFO & EVENT MANAGEMENT

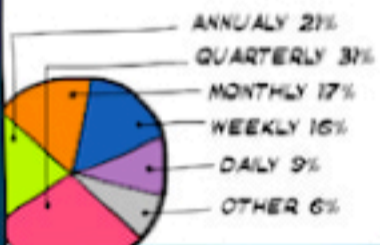

EXISTING ENDPOINT DEFENSES NOT ENOUGH

Over 50% plan to augment or replace their existing endpoint anti-malware protection.

IGNORANCE IS BLISS

Vulnerability scanning alerts users to security issues, but less than half of organizations scan more frequently than once per quarter!

CYBERTHREAT HEADACHES

On a scale of 1 to 5, with 5 being the highest, the biggest cyberthreat headaches are...

INSECURE MOBILE DEVICES

On a scale of 1 to 5, with 1 being the least secure, mobile devices, laptops, and social media apps are the cause of greatest concern.

CARELESS EMPLOYEES

What's standing in the way from defending against threats?
