BUSINESS GROWTH SOLUTION BRIEF

Accelerate business growth and enter new markets with Anitian

Accelerate business growth with Anitian

Leverage the fastest path to security and compliance for cloud applications, enter new markets, capture new business, and generate new revenue 80% faster.

In today's digital world, the company that can get to market and seize new business the fastest – with the right software – wins. The "right" software doesn't just need to be fully functional but also secure and compliant with applicable standards and regulations.

This is where many enterprises fall down when moving software applications to the cloud and seizing new markets and business opportunities. They do not realize that deploying a full set of cloud-based security controls and documenting compliance to standards such as FedRAMP, PCI, ISO 27001, GDPR, CMMC or HIPAA can require 12-18 months or more at a cost of up to $2 million. That's well over a year of costly delays, operational expenses, and lost opportunities to gain new revenue and market share.

FASTER TIME-TO-REVENUE

Speed up market entry and business growth by a year or more

As the world's leading cloud security and compliance automation platform, Anitian gives businesses the tools and technology to get-to-market faster than doing it yourself. If your company develops software or web-based solutions – or needs cloud-based applications to serve customers and manage operations – the Anitian Compliance Automation Platform can dramatically shorten the time you need to...

Participate in healthcare and pharmaceutical markets where HIPAA regulations are central.

Sell to the US Federal government and state and local government agencies that require FedRAMP or CMMC certification.

Serve businesses and consumers in the European Union where GDPR compliance is mandatory.

Ensure that all business units can meet the security requirements of the most demanding customers in their markets.

Migrate or Lift and Shift applications to the cloud.

Work with law enforcement agencies concerned with CJIS security policies.

Provide eCommerce services and solutions that are PCI compliant.

Bring acquired companies or assets up to high standards of security and compliance.

THE OLD WAY VS. THE NEW WAY

Typical time-to-market vs. with Anitian

Get to market up to 12-18 months faster and use fewer resources at half the cost versus the traditional way.

THE OLD WAY
Market-ready in 12-18 months

THE ANITIAN WAY
Market-ready in 60 days

4-6 Months
Design and deploy a cloud security environment

8-12 Months
Configuration, customize, and document the environment for compliance

Staff Required
Typically 10 full-time employees or contractors for 12-18 months

VS

1 Day
Stand up your application on the platform and verify security controls in a cloud secure environment

59 Days
Configure and document compliance with libraries, templates, and automated tools

Staff Required
Only 3 full-time employees for 60 days

Slash costs by 50% and get audit-ready in just 60 days.*

*Certain SLA assumptions and conditions apply.

Anitian Pre-engineered Compliance Automation Platform

Three steps to get your cloud applications Secure, Compliant, and Confident in 60 days.

When you move your applications to Anitian's pre-built cloud platform, your organization no longer has to select, deploy, and integrate multiple cloud security products. Nor do you have to devote a large team to configure, customize, and document the cloud environment for security and compliance.

1. SECURE: CLOUD SECURITY DEPLOYED DAY 1

Anitian's pre-engineered Compliance Automation Platform wraps your applications in a complete, integrated stack of cloud security technologies. These include products from industry-leading third-party vendors and native security and management tools from cloud platform providers like Amazon and Microsoft.
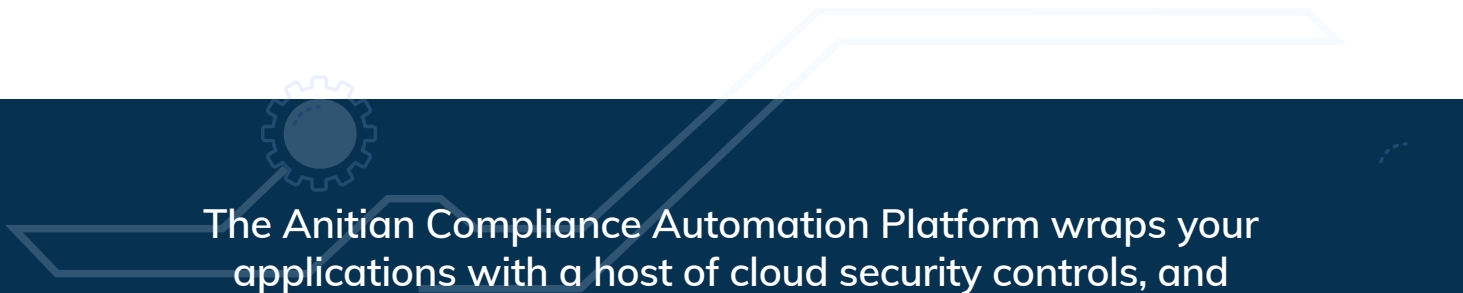

2. COMPLIANT: AUDIT-READY IN 60 DAYS

Anitian provides resources and tools that automate and standardize the compliance process including libraries of templates and scripts, reference architectures, compliance document templates and reports and more.
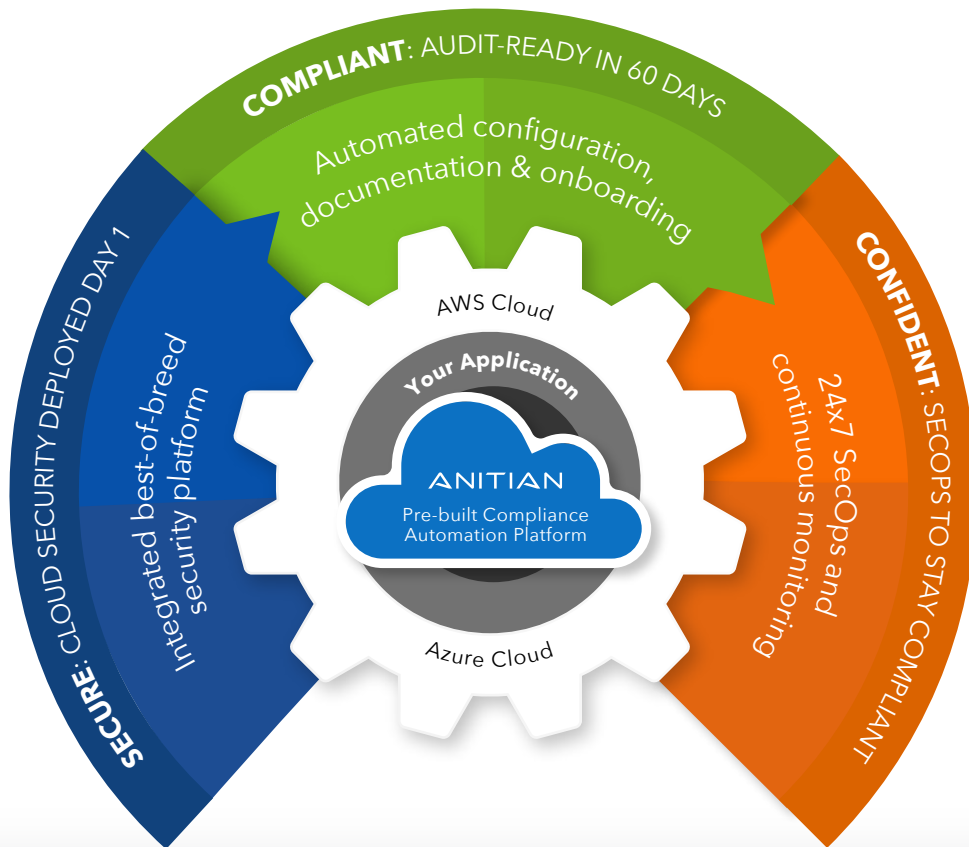

Anitian's team of cloud, security, and compliance experts will guide your team through the steps of configuring security controls and documenting compliance with major government and industry standards.

3. CONFIDENT: SECOPS KEEPS YOU SECURE & COMPLIANT

Anitian's 24x7 SecOps and continuous monitoring services ensure your applications stay secure and in compliance. Now your teams can focus on adding value to your business.

The Anitian Compliance Automation Platform wraps your applications with a host of cloud security controls, and automates configuration and compliance processes, all while keeping applications secure and compliant over time.

- ⊘ Penetration testing
- ⊘ Threat hunting

Align your business to enter new markets by eliminating cloud security and compliance barriers
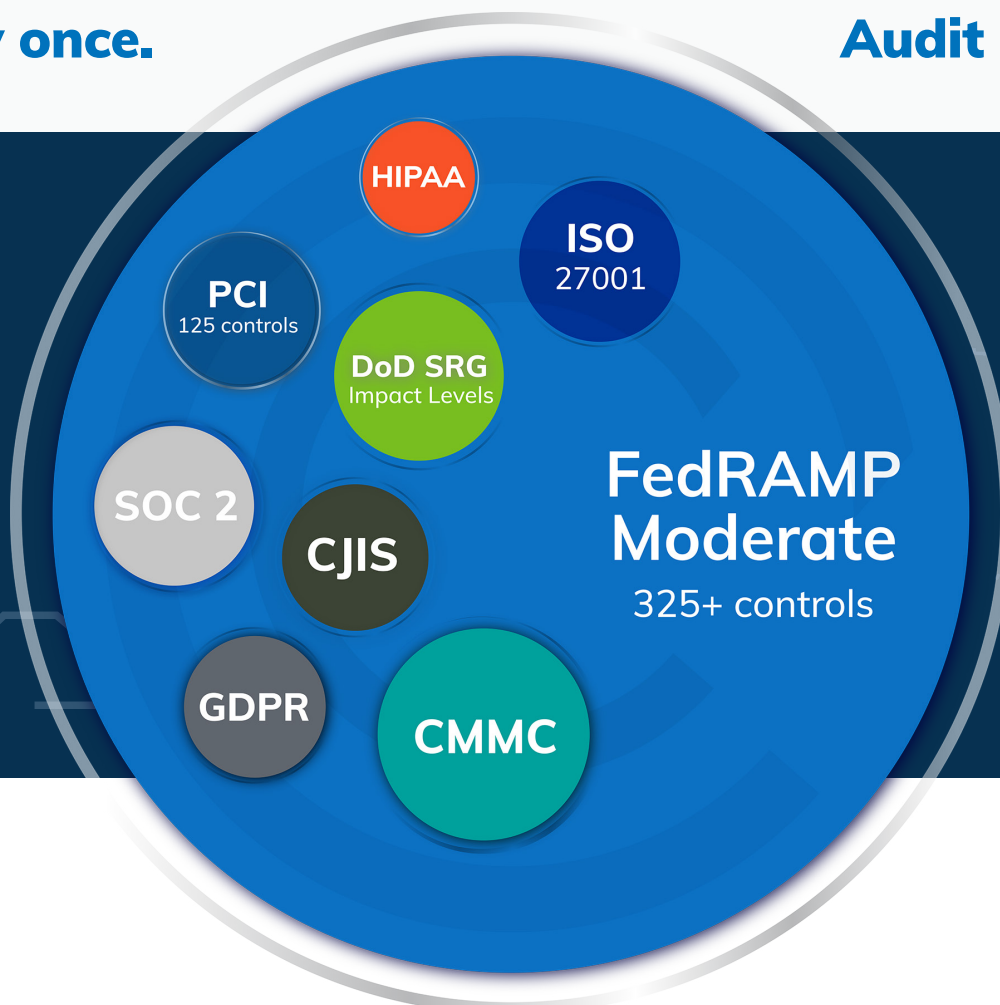

Anitian's secure and compliant cloud environment allows for a "ready once, audit many" approach.

The Anitian Compliance Automation Platform is pre-built to meet the most stringent security and compliance requirements right out-of-the-box. Because our platform is aligned with the FedRAMP Moderate compliance framework – which covers over 325+ specified controls – your business is automatically positioned for almost any audit required to access new markets including:

> **US Federal government markets** – requiring FedRAMP or CMMC certification

> **eCommerce markets** – requiring PCI DSS certification

> **Healthcare and pharmaceutical markets** – requiring HIPAA compliance

> **European Union markets** – requiring GDPR compliance

> **State and local government markets** – requiring CJIS compliance

Ready once.   **Audit many.**

Security, agility & business growth

The Anitian Compliance Automation Platform is designed to empower your business with a "ready once, audit many" approach.

Anitian's pre-engineered Compliance Automation Platform enables organizations to make applications secure and compliant at 50% of the cost of conventional cloud migration projects. In addition, Anitian continually updates its platform to protect your applications and data from emerging security threats, ensuring that your organization remains compliant with the latest regulations and standards.

The Anitian Compliance Automation Platform also enables your development team to unite security and DevOps, making them more agile and secure. You don't need to wait for security controls and policies to be manually configured for each new release. Instead, controls and compliance configurations can be integrated into continuous integration/continuous delivery (CI/CD) pipelines, to ensure that they are applied automatically to new releases.

Most important of all, Anitian's customers routinely make applications secure and audit-ready in 60 days or less, so they can enter new markets faster and meet rigorous security and compliance requirements from their most demanding customers.
