

COMPLIANCE AUTOMATION

PLATFORM

SOLUTION BRIEF

*Delivering the fastest path to security and
compliance for cloud applications*

COMPLIANCE AUTOMATION

PLATFORM

The Anitian Compliance Automation Platform offers high-growth SaaS enterprises the fastest path to security and compliance by wrapping critical security technologies around your cloud application on day 1. Built from the ground up, this pre-built cloud security and compliance platform directly integrates with DevOps CI/CD pipelines and includes configurations, documents, licenses, and onboarding to make existing or new cloud applications secure and compliant with FedRAMP, PCI, CMMC, GDPR, ISO, and more — all in up to 80% less time and at 50% of the cost.

Three steps to compliance:

1. SECURE: CLOUD-READY DAY 1

Anitian's pre-built Compliance Automation Platform wraps your applications in a complete, integrated stack of cloud security technologies in hours. These include products from best-of-breed third-party vendors and native security and management tools from cloud platform providers like Amazon and Microsoft.

2. COMPLIANT: AUDIT-READY IN AS FEW AS 60 DAYS

Anitian provides resources and tools that automate and standardize the compliance process including libraries of templates and scripts, reference architectures, compliance document templates and reports, and more. Anitian's team of cloud, security, and compliance experts will guide your team through the steps of configuring security controls and documenting compliance with major government and industry standards.

3. CONFIDENT: SECOPS KEEPS YOU SECURE & COMPLIANT

Anitian's 24x7 SecOps and continuous monitoring services ensure your applications stay secure and in compliance. Now your teams can focus on adding value to your business.

The Anitian Compliance Automation Platform wraps your applications with a host of cloud security controls, and automates configuration and compliance processes, all while keeping applications secure and compliant over time.

Typical time-to-market vs. with Anitian

Get to market up to 12-18 months faster, use fewer resources, and do it for half the cost versus the consulting services approach.

Consulting Services Approach

4-6 Months

Architect and Deploy

- Select vendors, hire consultants
- Conduct gap assessments
- Architect environment
- Deploy security controls

8-12 Months

Configure and Document

- Manage consultants
- Configure controls to requirements
- Document controls
- Integrate application
- Setup, staff, and perform security monitoring

Staff Required: 10-20 full-time employees and/or consultants

VS

The Anitian Way

1 Day

Deploy

- Deploy stack

59 Days

Onboard

- Onboard application
- Complete templates
- Start 24x7 Security Monitoring

Staff Required: 3-5 full-time developers

Anitian is faster because we automate:

- **Deployment** - eliminating manual work
- **Documentation** - eliminating busy work
- **Configuration** - eliminating human errors
- **Attack Detection** - eliminating threats
- **Response** - eliminating complexity

Slash costs by 50% and get audit-ready in just 60 days.*

*Certain SLA assumptions and conditions apply.

COMPLIANCE AUTOMATION PLATFORM

Deploy your applications into our pre-built
Compliance Automation Platform

SECURE

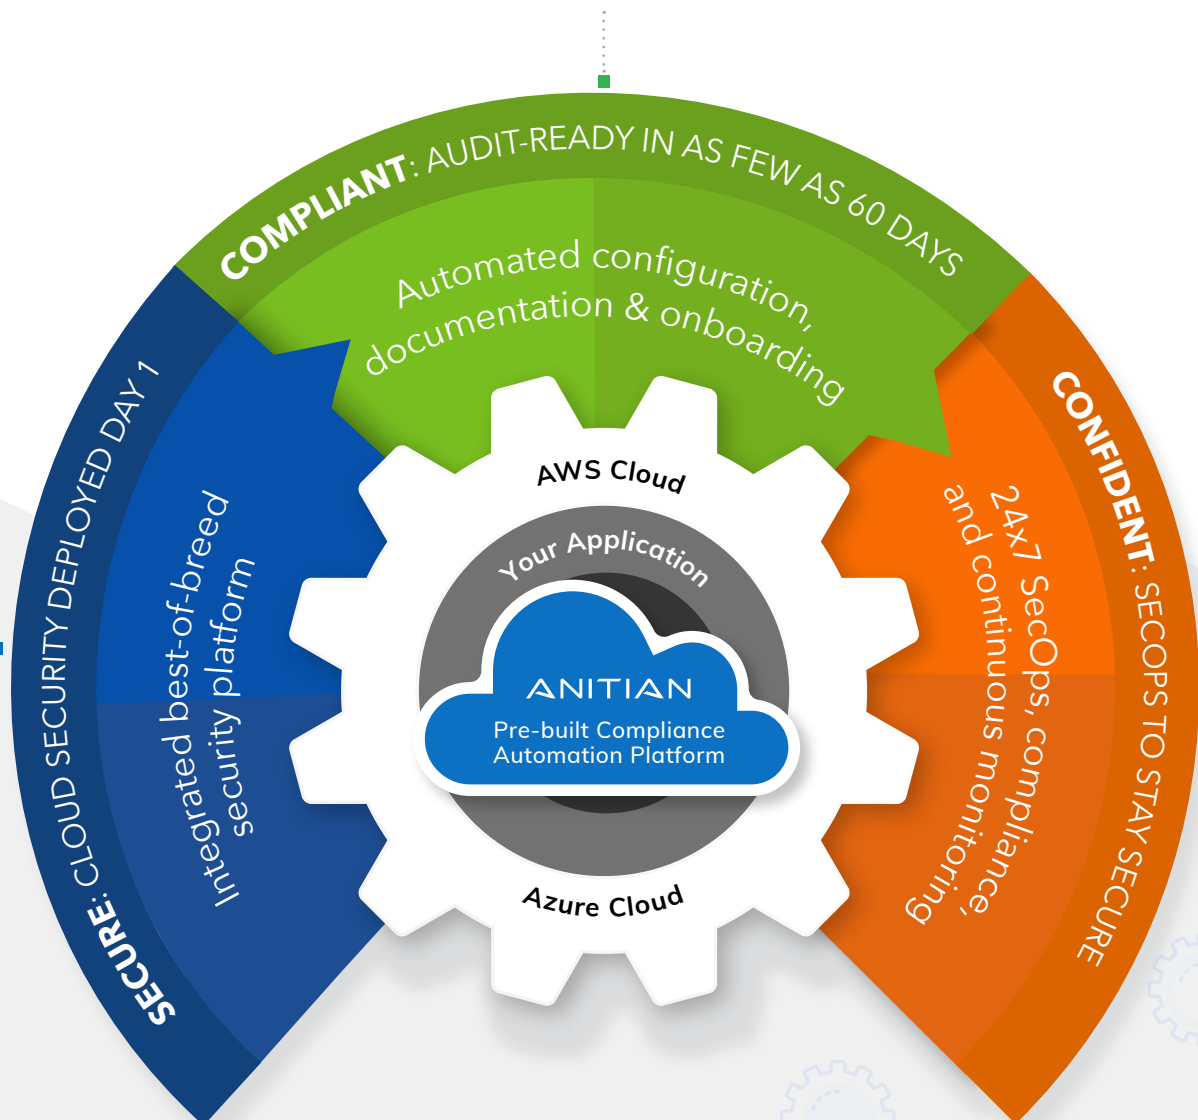

Surround your applications with a stack of integrated security solutions on 1 day. Eliminate the need to install, configure, and integrate a long list of disparate technologies.

COMPLIANT

Employ automated tools to rapidly configure, customize, and document all the controls needed for FedRAMP, CMMC, PCI, and other complex requirements to be audit-ready in as few as 60 days.

CONFIDENT

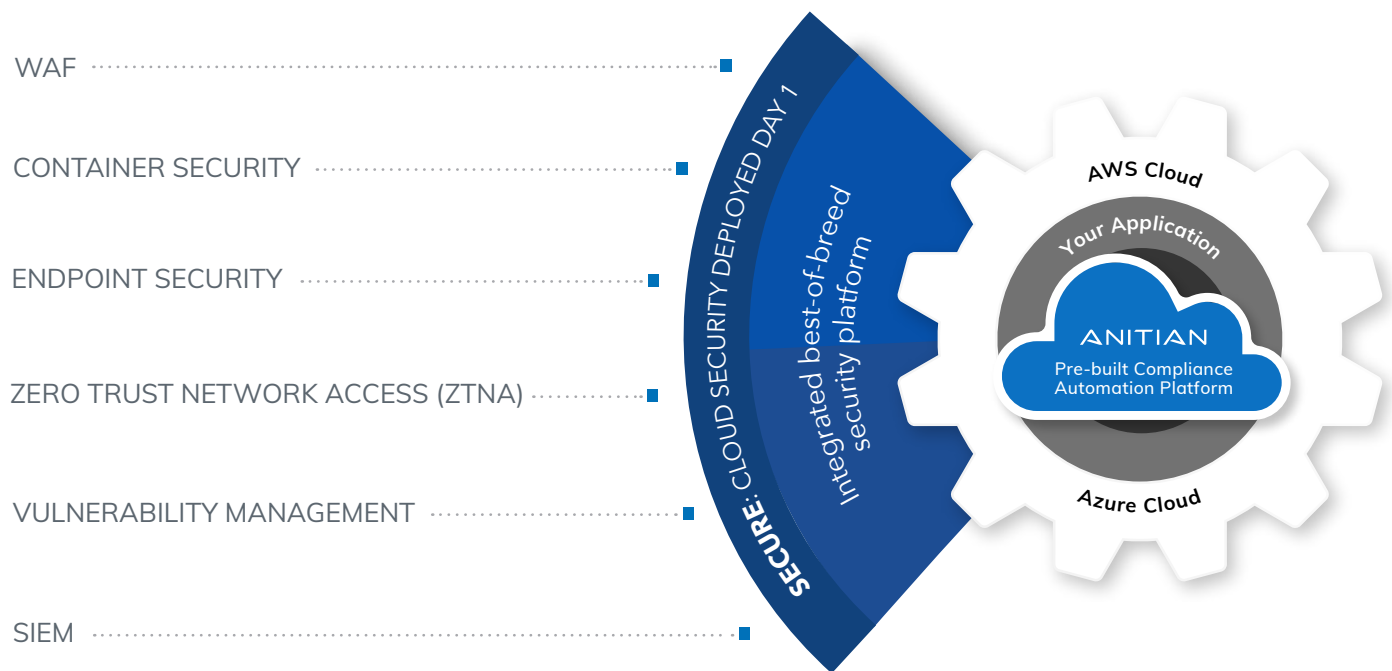

Use 24x7 SecOps to support your security team by continuously monitoring, penetration testing, threat hunting, and certifying compliance.

PRE-BUILT SECURITY

CLOUD SECURITY DEPLOYED DAY 1

With its pre-built platform, Anitian Compliance Automation Platform provides a complete, integrated set of best-of-breed security technologies right out of the box. The environment also leverages native security, management, and automation tools for well-known cloud providers like AWS and Azure.

**Cloud-ready when you are**

- + Aligned with the most complex security and compliance requirements.
- + Integrated and tested on the cloud platform.
- + Leverages native security tools from the platform provider.

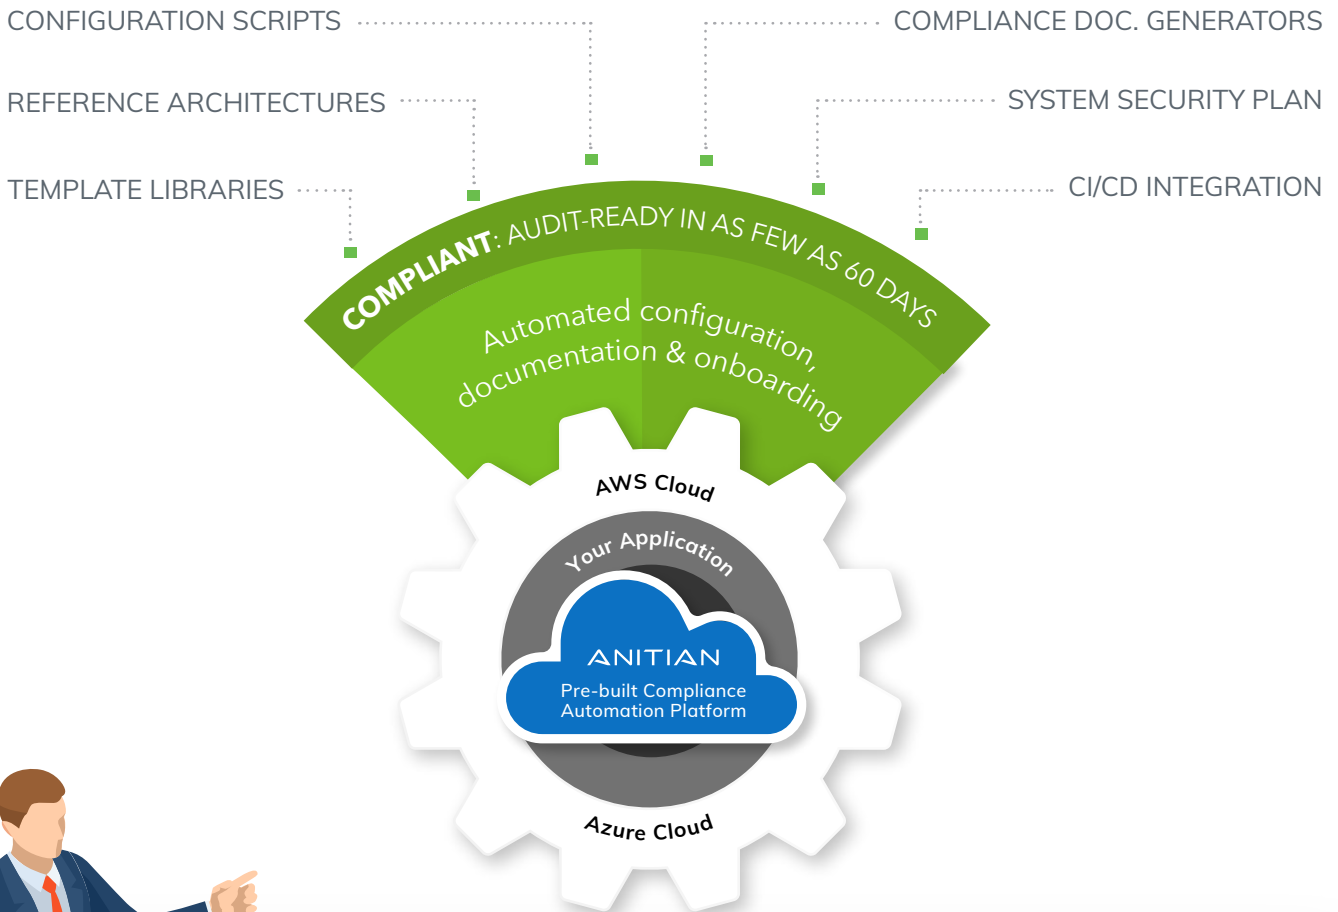

AUTOMATED DOCUMENTATION & COMPLIANCE

AUDIT-READY IN 60 DAYS*

The consulting services approach to achieving compliance has been to hire expensive professional services teams, dedicate months of your best security people to analyze compliance requirements, configure controls, and prepare compliance reports. The Anitian Compliance Automation Platform dramatically accelerates time-to-compliance by automating the process of onboarding your application, implementing controls and creating documentation.

New applications and existing ones migrated to the cloud can be made audit-ready in as few as 60 days – all aligned with the most complex security and compliance requirements like FedRAMP, PCI, CMMC, GDPR, ISO, and other industry and government standards.

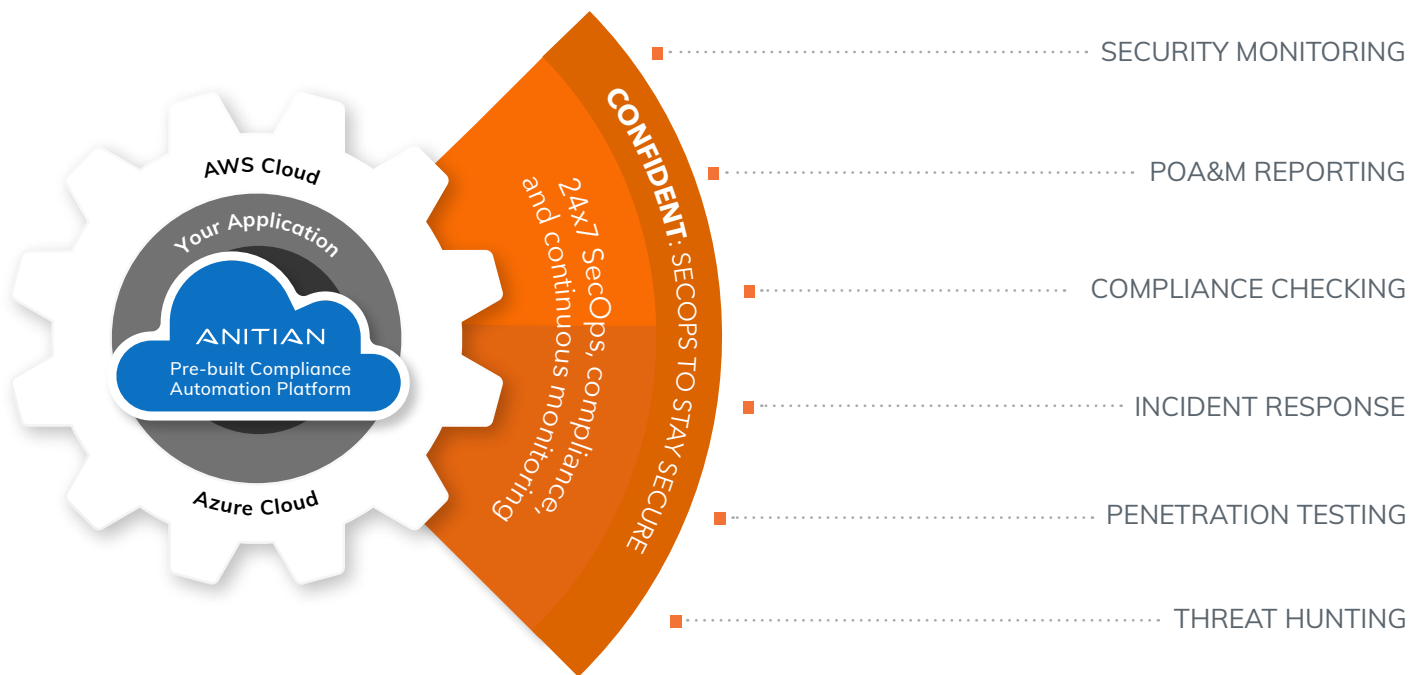

Audit-ready in 60 days*

- + Customized for FedRAMP, PCI, CMMC, GDPR, ISO, and more.
- + Up to 421+ controls (FedRAMP high-level systems).
- + Powerful “enter once, populate everywhere” documentation automation.

24x7 SECOPS & CONTINUOUS MONITORING

ALWAYS CONFIDENT

Anitian SecOps reduces risk, improves the overall agility of your business as well as protects your compliance investment of your cloud applications with 24x7 operations, either as an extension of your own security team or as your primary security operations team. Anitian continuously tests, assesses, and certifies your applications for compliance and generates all mandated monthly reports. We also increase the effectiveness of your security operations center with 24x7 SecOps and continuous monitoring services in areas such as security monitoring, incident response, penetration testing, and threat hunting.

**SECOPS TO STAY SECURE**

- + Continuously test and certify application compliance.
- + Generate mandated monthly reports.
- + Support and empower your security teams.

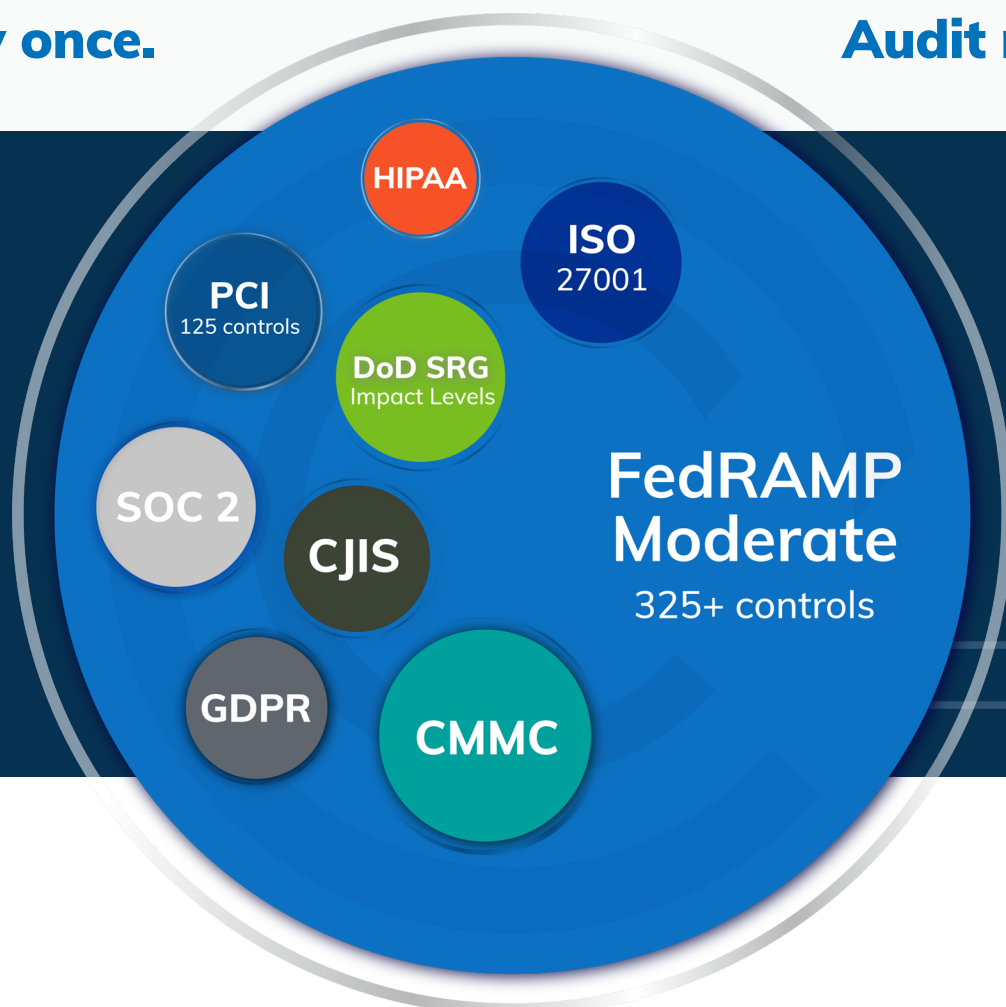

Anitian's Compliance Automation Platform enables enterprises to meet multiple complex compliance initiatives with a "ready once, audit many" approach.

The Anitian Compliance Automation Platform is pre-built to meet the most complex security and compliance requirements right out-of-the-box. Because our platform is aligned with the FedRAMP Moderate compliance framework – which covers over 325+ specified controls – your business is automatically positioned for audit-readiness across multiple compliance requirements needed to access new markets:

- > **US Federal government markets** – requiring FedRAMP or CMMC certification
- > **eCommerce markets** – requiring PCI DSS certification
- > **Healthcare and pharmaceutical markets** – requiring HIPAA compliance
- > **European Union markets** – requiring GDPR compliance
- > **State and local government markets** – requiring CJIS compliance

Ready once.

Audit many.

Anitian's Compliance Automation Platform offers:

- ✓ A pre-built cloud security and compliance platform
- ✓ Accelerated time-to-compliance and the fastest time-to-revenue
- ✓ The ability to get to market up to 80% faster and at 50% of the cost
